ITALY – Waterproofing and protection of marble stairs
application with HYPERDESMO® SYSTEM.

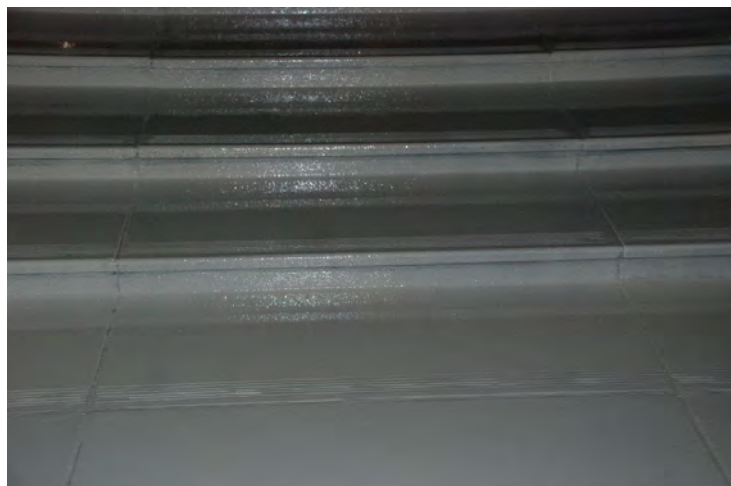

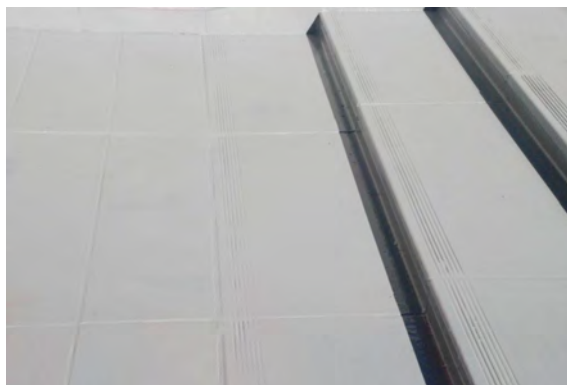

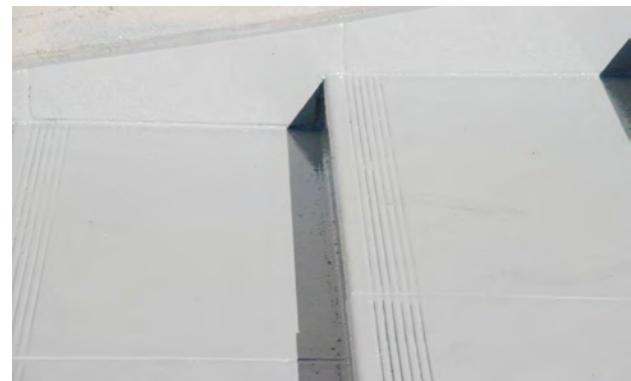

ALCHIMICA
BUILDING CHEMICALS

Project Description

In this project, the installation of marble stairs needed a complete waterproofing and protection system. Therefore, the HYPERDESMO® SYSTEM was used as a solution. For the sealing of the joints HYPERSEAL®-50FC-S was used and the MICROPRIMER-PU primer with its excellent properties in non-porous substrates, ideal for marble substrates.

Moreover, the HYPERDESMO®, the one component waterproofing polyurethane membrane was used with the HYPERDESMO®-ADY-E as a Top-Coat with its excellent mechanical, chemical, thermal, UV and natural element resistance properties..
