**Helipad Waterproofing and protection in IRAQ**

ALCHIMICA's hard traffic system, based on HYPERDESMO® liquid applied waterproofing membranes, has been applied on the concrete roof helipad in a beautiful landscape in IRAQ.

Helipads are constantly being used and subject to heavy and abrasive effect of landings. HYPERDESMO® System protects the deck's structural slabs, tackling from the beginning threats like water ingress, aggressive chemicals, gas penetration, external mechanical pressures, and temperature variations.

Total area = 2325 m2.

The materials used in the application:

PRIMER: AQUASMART®-DUR

MAIN MEMBRANE: HYPERDESMO®- CLASSIC

Topcoat: HYPERDESMO®-ADY-E.

Traffic line marking: AQUASMART® -TC 2K Floor Protect

Sealing Solutions: HYPERSEAL®-EXPERT 150
